

HiPath 3000/5000 Manager C

Administration Program for HiPath 3000 and HiPath 5000

HiPath 3000/5000 Manager C is a Windows application that enables customers to carry out simple configuration tasks by themselves.

Functionality:

- Network-wide administration of all HiPath 3000/5000 systems from a central location
- Management of all customer data in one central database
- Simple, network-wide functions for setting up, relocating and changing subscribers

The most important new feature in HiPath 3000/5000 Manager C is the "subscriber view" of the data. Service personnel can now quickly gain a complete picture of the functions used by individual subscribers.
