

# VoxBox

Voice Mail... Automated Attendant – Lite Edition

Many organisations now regard voice processing as an important, or even vital management tool.

Until recently, however, the purchasing of a voice-processing system could be as expensive as the telephone system itself. This has been due to the expense of PC-based systems, incorporating PC hardware and companion/expensive voice-processing cards.

Definitive Communications Management

VoxBoxLite from Oak is different. Incorporating extremely reliable solid-state technology, VoxBoxLite is a wall mounted voice processing system utilising flash-memory technology. VoxBoxLite is a 2 port system, with a memory capacity of 5 hours.

Subject to a Service Level Agreement, VoxBoxLite is supported remotely by our trained technical staff at our dedicated customer service centre in Dorset.

Oak provide a full range of Voice Processing Systems, including the VoxPro range of PC-based systems for larger applications and Oak recommend VoxBoxLite for a maximum of 32 extensions per customer site.
