- 5 CMYK breakdown
- 6 sRGB values
- 7 HTML value (for web design)

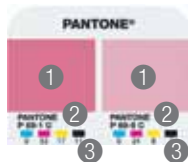

## Color Checker Primer

Page containing colors from the Munsell ColorChecker mini checker chart.

## CMYK Guide

- 1 CMYK color area
- 2 CMYK number (not PMS)
- 3 CMYK breakdown

## Solid Chips

Solid chips coated, uncoated, Metallic, Premium Metallic, Pastel & Neon

- 1 Color chip
- 2 Pantone number

## Index

Use the index pages at the back to find the Pantone color you need.

## PANTONE PLUS Product Numbering - Quick Reference

The table below shows information about each of the Graphics Systems. Each Pantone guide uses a set of base ink colors from which all the colors in that system may be mixed. The table will help to identify which Base Ink colors come from which guide.

There is also a listing (Reference Numbers) showing which Pantone color numbers come from which guide.

## LIGHTING INDICATOR STICKERS

Two light-sensitive patches react to the viewing illumination, changing color under different lighting temperatures. Under proper lighting the two patches will appear to match. If the light is not in D50 or D65 range (depending on the stickers that are used), the two patches will appear different. The further the light source is, the more contrast the two colors of the indicator will display.

Each page contains 40 stickers, product is sold in individual pages.

**PANTONE LIGHTING INDICATOR STICKERS D50** LNDS-1PK-D50 **£40.00**

**PANTONE LIGHTING INDICATOR STICKERS D65** LNDS-1PK-D65 **£40.00**

## ESSENTIALS SAVINGS BUNDLE

The ESSENTIALS bundle gives you everything you need to select, spec and match solid and process colors. Six-guide set includes PLUS SERIES FORMULA GUIDES Solid Coated and Uncoated, COLOR BRIDGE Coated and Uncoated and CMYK Coated and Uncoated.

Includes COLOR MANAGER Software.

**REFERENCE LIBRARY** GPC105 **£932**

## PANTONE SkinTone™ Guide

The PANTONE SkinTone Guide is a visual reference of human skin tones for use in any market where skin colors are relevant.

The colors in this guide were created by sampling actual skin tones across the full spectrum of human skin types, and were specially formulated to be the closest physical representations of skin colors. Strict quality control standards that have made Pantone the language of international color communication were applied.

### Guide Features

- 110 colors numbered from 1Y01 SP to 4R15 SP
- Each color is identified by a unique PANTONE Number that represents both the tone and the undertone of the color
- Large-size swatch with central aperture for easy color evaluation and matching
- Digital values available in PANTONE COLOR MANAGER Software
- Includes color index
- Colors were developed to present the best color match when evaluated under D65 (Daylight 6500K) lighting

**PANTONE SkinTone™ Guide**

STG201

**£71.00**

## Specialty Metallics & Pearlescents for Product Design

PANTONE Specialty Metallics & Pearlescents is a brand new collection of 175 luxurious colours for products and any other applications where metallic colours are applied to a product or surface. The colors are shown in a nitrocellulose lacquer, applied on paper.

### Metallic Colors

The new collection features 117 metallic colors created using a 12% aluminum flake as a base. Metallic flake reflects light without changing its wavelength, adding depth and vibrant visual interest without altering the perceived color.

### Pearlescent Colors

The 58 pearlescent colors in the palette were created using both a 12% metallic flake plus a pearl (mica) base. Mica refracts light into analogous wavelengths, creating subtle pearlescent shifts in the perceived color for a rich, lustrous look.

### Specialty Metallics & Pearlescents for Product Design

SMPG100

**£95.00**

### Specialty Metallics & Pearlescents Chips for Product Design

SMPC101

**£195.00**

Fashion + Home presents a set of tools to enable textile designers, buyers and printers to manage color in their workflow. The system is made up of 2,100 colors which match to leather, hard goods, cosmetics etc and includes paper and cotton swatch guides to be used in the Fashion and Home markets.

## paper guide

- 1 Color Area
- 2 Color Number and Color Name

All 2,100 colors are shown in a nitrocellulose lacquer, applied on paper for perfect match with leather, hardgoods, cosmetics etc. The suffix is TPX (textile on PAPER).

## specifier pages

- 1 Color Area
- 2 Color Number

Six chips per color, seven colors per page.

## COTTON GUIDES

### cotton swatch

- 1 Color Number and Color Name
- 2 Large piece dyed cotton cloth 20 x 10 cm.

All 2,100 colors are shown in 100% cotton woven swatches. Depending on the product type, you can get this from 1x1 cm swatches (one layer glued on paper) up to 10x10 cm swatches (double layer, loose format). The suffix is TCX (textile on COTTON).

### nylon swatch

- 1 Color Number
- 2 Large piece dyed nylon cloth 20 x 10 cm.

TCX denotes Cotton color.  
 SWCDX denotes Cotton swatch.  
 SWCDN denotes Nylon swatch.

## color guide

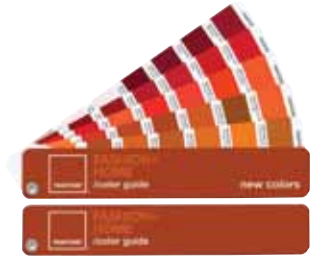

Portable color-on-paper fan deck set contains 2,100 FASHION + HOME colors, including 175 new colors. Ideal for sample shopping, client or vendor meetings and on-site reviews.

- Each color is numerically referenced and named for quick color decisions.

## PLASTIC STANDARD Chips: A New Standard

A new colour standard that gives designers working in plastic access to all colours in Pantone's major libraries.

PANTONE PLASTIC STANDARD Chips provide designers across all industries – from industrial and product design to fashion accessories and toys – with an internationally recognized colour language for plastics.

Industrial designers can now select and specify any colour from the PANTONE PLUS SERIES or FASHION & HOME Colour Library. The polypropylene chips large size – 7.5cm x 4.5cm – makes for easy colour visualization and easier measurement.

Spectral data and masterbatch formulation included. Custom color matches can be provided.

- ① Pantone color number
- ② Matte color area
- ③ 1mm thick
- ④ 2mm thick

## PLASTIC STANDARD Chips

Large-size (7.5cm x 4.5cm) polypropylene chip standard in every PANTONE PLUS SERIES and PANTONE FASHION + HOME Color. Polypropylene chip material closely aligns with common real-world production materials, ensuring accurate color reproduction in your product.

- Chips have both gloss and matte finishes for better color visualization.
- Chips available individually, so you only order what you need; custom colors available.
- Spectral data and pigment formulations included.

**PLASTIC STANDARD Chips**

PLASTIC-CHIPS

**£14.00**

## PLASTIC STANDARD Chips Color Collection Vol. 1

## Formula Scale LC, 2-lb Capacity

Developed for the smaller printer and infrequent spot color user. This scale is perfect for making small mixes of PANTONE Colors. Easy to use. Programmed to provide exact ink formulations for all PANTONE MATCHING SYSTEM Colors.

- Higher resolution provides accurate results.
- Switchable between lb and kg.
- Dual function: choose PANTONE Formulations or conventional weighing.

**Formula Scale LC**

PFS3-1-22

**£1,400**

## Formula Scale 3, 10-lb Capacity

Provides fast, accurate and reliable ink formulations in seconds to let you mix your own PANTONE PLUS SERIES Colors, including Pastels and Metallics. Larger capacity formula scale is great for medium to large ink mixes and lets you save time and money by mixing only the inks you need.

- Programmed to provide exact ink formulations for all PANTONE PLUS SERIES Colors.
- Large, backlit display provides detailed information.
- Indicator bar shows progress of each base ink addition.

**Formula Scale 3**

PFS3-5-22

**£1,785**

## Color Viewing Light, 3-Light Unit

The right lighting is critical to accurate color evaluation. Take the guesswork out of color matching with the help of these three different lighting environments: daylight, fluorescent and incandescent settings.

- Space-saving countertop design.
- Shielded viewing area.
- Simulate daylight, home and store environments.

**3-Light Unit**

PVL310

Note: only available from certain dealers – please email [infoeuro@pantone.com](mailto:infoeuro@pantone.com) for contact details.

## Color Viewing Light, 5-Light Unit

For more refined lighting-environment control, our 5-light unit offers five different lighting environments. See how colors will look under fluorescent, incandescent, UV and two daylight settings.

- UV source stimulates optical brighteners, whitening agents, fluorescent pigments and dyes.
- Identify troublesome metameretic effects.
- Neutral background for accurate color viewing.
