PLASTICS System

We take the guesswork out of color matching for plastics. Our plastics color system provides a way for designers and manufacturers to accurately specify colors for their products.

■ System includes transparent, opaque, pearlescents, fluorescents and metallics.

■ Color chips provide three thicknesses to display different levels of translucency.

■ Chips are arranged and stored in ring binders. All chips have a gloss finish & opaque chips a matte finish.

▶ transparent

PANTONE PLASTICS transparent selector

The PANTONE® PLASTICS transparent selector consists of a comprehensive palette of 735 transparent colors that are widely used in the manufacture of plastic materials and products.

■ 735 transparent colors
■ Chips are arranged and stored in 2 ring binders

PLASTICS transparent selector (2 binders)

PBT100	**£1260**	**€1575**

▶ opaque

PANTONE PLASTICS opaque selector

The PANTONE® PLASTICS opaque selector consists of a comprehensive palette of 1005 opaque colors that are widely used in the manufacture of plastic materials and products.

■ 1005 opaque colors
■ Chips are arranged and stored in 3 ring binders

PLASTICS opaque selector (3 binders)

FASHION & HOME

Technical advancements in today's marketplace have inspired us to redesign our PANTONE FASHION + HOME Color System so it works harder for you. To help uphold consistency and accuracy of all 1925 colors in our system we formed a partnership with Clariant International Ltd., one of the world's largest textile colorant and chemical producers. Together, Pantone and Clariant are proud to present our SMART system, the world's first method of color creation designed with the fashion and home furnishings markets in mind.

select color

color guide – paper

New larger size format provides a greater visualisation of color. Stripe coated and chromatically arranged by color family, our color-on-paper fan deck contains all 1925 PANTONE Textile Colors.
