**Notes**

- All quantities shown are actual quantities required for each plot. Any excess (for breakage etc.) should be allowed for by the surveyor.
- All stone components are to be smooth PORTLAND STONE finish.
- All components over 25kg are to have recessed lifting eye sockets cast in.
- Any reinforcement deemed necessary by the supplier for safe handling and transportation is to be included.
- Details indicated allow for manufacturing in wet cast acid etched concrete. Details and unit sizes will vary if dry cast is selected.
- Minimum reinforcement for structural members is noted on these drawings. Supplier to provide all other necessary reinforcement in accordance with normal standard / good practice.
- Reinforcement must be provided with 40mm concrete cover. Where ever this cannot be achieved the supplier will be required to use stainless steel reinforcement.
- Supplier will be required to determine both quantities and provide bar bending schedules for reinforcement as necessary - all for suppliers own use.
- Lapped joints in reinforcement bars for stonework concrete will **not** be permitted.
- Concrete strength for all structural stonework and cavity walls to be 35N/mm<sup>2</sup> at 28 days with 10mm max. aggregate size.
- Supplier to incorporate and supply all necessary fixings in accordance with normal standard / good practice, for all stonework / concrete members. (e.g. dowels, straps, ties, support brackets etc.)

Stone manufacturer to design & detail all units & provide all structural reinforcement to all stone units shown on this drawing which are all load bearing members.
