

SEMINAR TITLE

'ASBESTOS REGULATIONS AND THE EFFECTS OF THE BUILDING REGULATIONS PART L ON REFURBISHING OLD ASBESTOS AND FIBRE CEMENT SHEETS'

Duration - 1 hour

Contents

This N.F.R.C. (National Federation of Roofing Contractors) CPD accredited seminar will bring you fully up to speed on the current Asbestos Regulations relating to the removal / encapsulation of asbestos cement sheets.

The seminar will also cover how the Building Regulations Part L England have affected refurbishment works and from 6th April 2006 the requirements that will have to be adhered to.

As well as the above, a number of case studies covering **Filon's Over-Roofing System** will be shown which will show a large range of different types of buildings where the Asbestos Regulations and the Part L Regulations have been overcome at a fraction of the cost of removing and replacing the roofs.

Supporting Literature

All attendees of the seminar will receive supporting literature covering the points raised as well as case studies and relevant information relating to the **Over-Roofing System**

All attendees will also receive a certificate of attendance relating to this seminar.

Venues

The seminar can be held in-house.

Requirements for the Seminar

One 240 volt, 13 amp plug socket.

Availability

Notice will be required to book seminars. The seminars can be carried out within or outside of working hours as required. Please note that demand is such that at least two months notice will be required for seminar bookings.
