

**For work, leisure or pleasure
the choice is yours...**

Whether you are a professional dancer, a budding amateur or simply wish to join the growing trend for pole dancing as a fun way to keep fit, **Polestar** dance poles are the ideal choice.

Manufactured from 51mm (2") diameter polished stainless steel tube, **Polestar** dance poles are designed to be used for a full range of dance moves, routines and tricks, limited only by your ability*.

The range allows you to select the features that are important to you. Fixed or completely removable, one piece or two piece tube with the option of additional adjustment to accommodate variations in ceiling heights.

For venues or events that require a raised platform, or where it is not possible to fit the pole to the ceiling, **Polestar** dance podiums provide the ideal solution.

Podiums are available with fixed or demountable base units and supplied with a heavy duty 3m (10ft) long dance poles as standard.

Polestar podiums are strong and rigid enough to allow full range of dance routines and tricks with the necessary stability provided by weights, which fit the podium base.

* subject to correct and secure fitting

Polestar

Our most popular pole, which is fully removable without the need for screws or permanent fixings.

Quick and simple to install and remove. Locate the pole in position* and a few turns of the adjustable foot at the bottom of the pole with the spanners provided clamps the pole securely between floor and ceiling.

- Completely removable
- No drilling
- No screws
- No permanent fixing
- Quick and easy to install and remove
- Rigid one piece design
- Polished stainless steel tube
- 2" diameter tube

* On plasterboard type ceilings poles must be sited directly below ceiling joists.

Polestar Club

The traditional style of fixed pole for permanent installation with flange fittings that screw to floor and ceiling

- Top and bottom flange fittings for permanent installation
- Rigid one piece design
- Polished stainless steel tube
- 2" diameter tube

Polestar Semi Removable

Basically a standard Polestar with a permanently fixed ceiling flange (see Polestar Club) in place of the load spreader disk. This aids installation when the pole is installed regularly in the same position.

- Removable pole
- Permanent ceiling fixing
- Quick and easy to install and remove
- Rigid one piece design
- Polished stainless steel tube
- 2" diameter tube

Polestar Plus

Completely removable without the need for screws or permanent fixings; quick and simple to install and remove.

Up to 400mm (16") of additional adjustment is provided at the top of the pole to accommodate variations in ceiling height.

- All the features of the standard Polestar
- Up to 400mm (16") of additional adjustment

Polestar Split

A portable two piece pole that is completely removable without the need for screws or permanent fixings.

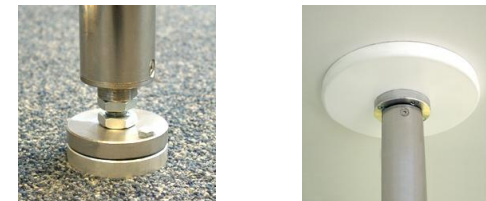

- All the features of the standard Polestar
- Portable two piece pole

Polestar Twist

An "American style" spinning pole with roller thrust bearings providing smooth rotation that can be converted into a static pole in seconds.

Fully removable and permanently installed versions are available.

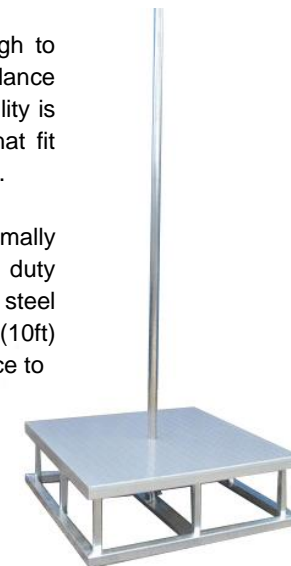

- Spinning pole
- Roller thrust bearings for smooth operation
- Converts to a static pole in seconds
- Fully removable and permanently installed versions available.

Polestar Dance Podiums

Available with either one piece or demountable base units, Polestar dance podiums are designed to be used freestanding without any fixing to the top of the pole.

Strong and rigid enough to allow a full range of dance moves and tricks, stability is provided by weights that fit within the podium base.

Podiums are normally supplied with a heavy duty polished stainless steel dance pole up to 3m (10ft) long and a black valance to dress the sides of the base.

Podiums are also available for hire.
