International E-Business

I was a computer programmer in South Korea and I came to the UK to change my career to business or management. Then I found this course and I have been very satisfied. Wonderful tutors, excellent facilities and lovely staff. For these reasons, I am pleased to have an opportunity to recommend this course.

In my case, I chose the E-business programme, continuing right through to the full Diploma to learn the basics for my Masters degree. But I think this course is also good for finding a job or managing your own business because it includes not only theories of E-Business but also many practical things such as business planning, CV preparation, finance, book keeping, management, law and so on. What's more, by continuing to the full Diploma I earn additional qualification in marketing and Internet marketing. It will help me wherever I go!
