

ChequeStore™

- Automated Cheque, Voucher & Credit Slip Scanning
- Signature Verification
- View, Print, Fax, e-mail or web-delivery

ChequeStore™ automates the process of scanning and electronic archiving of cheques, vouchers, credit slips and any document up to A6 - and provides access to the images within seconds from any PC. Web-based Corporate Customer interface is available, providing self-service capability.

- Cost Reduction
- Improve Quality of Customer Service
- Increase Employee Productivity
- Reduce Data Entry and Potential for Error
- Eliminate Microfilm and Photocopying

- Secure Archive
- Custom Reporting
- MICR (CMC 7 & E 13 B) and OCR (A & B) Support

ChequeStore™

Cheques, vouchers and slips are automatically scanned at the rate of up to 2,000 per hour, per scanner. Both sides may be scanned, and physically stamped if required.

MICR and OCR support provides recognition of CMC 7 and E 13 B fonts, and OCR A, OCR B and the OCR B and E13 B mixed font. The captured data is used to automatically create the index files for archiving purposes, and is also available to be uploaded to the Banking or Financial application, and for Reporting purposes.

Signature cards may be scanned to provide on-screen Verification.

A single search will retrieve the required item within seconds. More sophisticated searches may be made for a range of item values or dates for example. This capability dramatically assists in the investigation process. Once retrieved, items may be e-mailed, printed, faxed or delivered by CD-ROM or via the Internet.

ChequeStore™ is designed for ease of integration with DataStore®32, the market leading Internet-enabled Information Repository. This provides the capability to view cheques or credit slips for example, alongside the corresponding computer generated Statement or Report, thereby considerably easing reconciliation tasks.
